Profile Summary

Computer Science undergraduate with a strong interest in software development. Having a solid foundation in programming and eager to apply knowledge in building efficient, user-friendly solutions.

Education

B.Tech – Computer Science and Engineering 2023–2027
GITAM, Visakhapatnam
CGPA: 7.79

Class XII – Prabha Junior College, BIEAP 2023
Percentage: 93.2%

Class X – St. Francis School, ICSE 2021
Percentage: 83.6%

Skills

- Programming Languages: Java, Python, SQL
- Web Technologies: HTML, CSS, JavaScript
- Database: MySql
- Core Concepts: Data Structures & Algorithms, Object Oriented Programming(OOPs), Computer Networks
- Tools: Git, GitHub, VS Code, MySQL Workbench

Projects

Face Recognition Attendance System – Python, OpenCV, CSV
Developed a real-time face recognition attendance system that automatically records attendance with date and time in a CSV file, reducing manual entry work and preventing duplicate attendance records.

Online Travel Service Website – HTML, CSS, JavaScript
Developed a responsive travel service website that helps users explore destinations, compare travel packages, and access booking and travel information in one platform. Added interactive search and filtering, package sorting, dynamic booking cost estimation, form validation, and an interactive gallery to simplify travel planning and improve user experience.

Public Health Analysis – Python, Pandas
Analyzed public health dataset to identify patient trends, hospital resource usage and treatment-related patterns. Used data preprocessing and exploratory data analysis to extract useful insights and developed a priority-based patient allocation approach using queue logic to support faster decision-making.

Experience

Infosys Springboard Virtual Internship 6.0 Nov 2025 – Jan 2026

- Developed an AI-based skin analysis system using Python, TensorFlow/Keras, OpenCV, MTCNN, and Gradio.
- Built a CNN model to classify wrinkles, dark spots, puffy eyes, and clear skin from facial images.
- Implemented face detection, image preprocessing, confidence score prediction, and CSV report generation with a web-based interface.

Certifications & Achievements

- IBM Z Hackathon (Nov 2025)
- Forage Virtual Simulations – Deloitte & Tata (Jun 2025)
- IBM Generative AI Fundamentals (Aug 2024)
