Projects

Face Recognition Attendance System Python, OpenCV

- Built real-time face detection system using OpenCV and `face_recognition`.
- Automated attendance logging in CSV with timestamp and duplicate prevention.
- Improved efficiency of attendance tracking compared to manual process.
- GitHub: github.com/MandaSasank

Public Health Analysis – Datathon Python, Pandas

- Performed EDA on hospital dataset and identified key trends.
- Built priority-based patient allocation system using queue logic.

Internships & Virtual Experience

Infosys Springboard Virtual Internship 6.0 — Infosys Nov 2025 – Jan 2026

- Developed AI-based facial skin aging detection system (DermalScan) using computer vision.
- Applied image processing techniques for feature extraction and prediction.

AI/ML Internship — SmartInternz Aug 2024 – Sep 2024

- Worked on ML workflows, preprocessing and mini projects.

AI Azure Internship — Microsoft Jun 2025
Forage Simulations (Deloitte & Tata) Jun 2025
IBM Z Datathon Nov 2025 **Salesforce Agentforce** Nov 2025 **Adobe Hackathon R1** Aug 2025
